ABSTRACT

This directory brings together in summary form the functions of the various members of the United Nations Organization and the information systems and services they provide. It is intended to show the reader what exists and where to obtain further details. The contents are divided into four parts. The first part lists the organizations of the United Nations whose functions or programs involve the collection, dissemination, or analysis of information; organizations of an administrative nature are not included. The second part gives individual descriptions of the information systems belonging to the organizations listed in the preceding section. The third part presents addresses by country to facilitate contact between users and organizations, systems, and services. The last section is a subject index designed to assist users in identifying the systems and services which deal with information in a given field. (RAO)

Preface

A generation ago the United Nations Organization was founded with the aim of maintaining peace and security, solving international problems and promoting respect for human rights and fundamental freedoms. There are now more than thirty members of what is usually called "the United Nations family". Some, very new, foster international action on problems recently identified. Some deal with problems on which the need for international action has been recognized for a century or more.

All these organizations gather and disseminate information; for some in fact it is one of their most important functions. All are united in dealing with problems of international cooperation and development, an activity which in itself generates much unique information. There is a continuous exchange of information between governments and organizations and between members of the family themselves. Many joint efforts and work programmes are directed at the transfer of operational information on development to meet the national objectives and priorities of recipient countries.

To support programmes for international cooperation and development and to serve the needs particularly of recipient countries, a number of information systems and services have been established by the United Nations family. This Directory is the first comprehensive attempt to describe this important sector of United Nations activities.

The Directory brings together in summary form the functions of the various members of the United Nations family and lists the various information systems and services they provide. It is intended to show the reader what exists and where to obtain further details. The Directory therefore also includes, by country, lists of addresses of organizations, of centres contributing information to the various systems, of United Nations information centres and of libraries where collections of organizations' publications can be found.

As broad a definition as possible has been placed on the contents. However for the very important group of systems dealing with international statistics the reader is referred to the Directory of International Statistics (Statistical Papers, Series M, No. 56: United Nations, New York, 1975). Statistical systems covered by the Directory of International Statistics are only included here if organizations felt that it would be helpful to the reader usually because of some special general features of the services provided.

This directory represents the joint effort of a number of staff in the United Nations family. I hope that it will be useful to the governements and the peoples of the world that we all serve.

John W. McDonald, Jr.
Chairman, Inter-Organization Board
and Deputy Director-General
International Labour Office

Geneva, 1978

INTRODUCTION

General

This Directory is intended to enable users to identify what information systems and services are provided by the United Nations family of organizations and where further details on a particular subject can be found.

The descriptions of the systems and services included in the Directory should be sufficient to enable individual users as well as intermediate users, such as the information services of countries, to locate an appropriate source. For further particulars the user should consult the relevant source, with the help of the addresses supplied.

This first edition was compiled in English during the first months of 1978. Versions in French and Spanish are also to be issued in 1978.

The contents are divided into four parts:

Part I : United Nations Organizations
Part II : Information Systems and Services
Part III: Country Index
Part IV : Subject Index

The following paragraphs give an explanation of the structure and contents of each part and the concluding paragraphs explain how to use the Directory.

Part I: United Nations Organizations

The first part of the Directory lists the various organizations of the United Nations family whose functions or programmes involve the collection, dissemination or analysis of information. Organizations of an administrative nature are not included, for example: the International Civil Service Commission; the United Nations Joint Staff Pension Fund, etc.

The organizations included fall into two groups: (a) the United Nations, including its regional commissions, and the organizations created by the United Nations General Assembly; (b) the specialized agencies and other organizations within the United Nations family. The index which precedes Part I gives a full list of the organizations included in the Directory.

To help the reader refer from one part of the Directory to another, each organization has been given a reference number. These reference numbers run from 01 to 22 for the first group of organizations and from 51 to 65 for the second group.

The structure of each entry in Part I follows a standard pattern of six elements:

(1) the acronym or initial letters of the title by which the organization is commonly known followed by the reference number assigned to it in the Directory.
For example: UN 01, ILO 51, etc.

(2) the full title of the organization
For example: UNITED NATIONS
INTERNATIONAL LABOUR ORGANISATION

(3) the heading "Functions" followed by a summary of the principal functions, objectives, etc. of the organization.

(4) the heading "Headquarters" followed by the address of the headquarters of the organization.

(5) the heading "Regional and other offices" followed, if appropriate, by the addresses of the principal regional or other offices of the organization.

(6) the heading "Country Offices" followed, if appropriate, by an alphabetical list of those countries in which the organization has an office. The addresses of the offices are given in Part III, List A.

Part II: Information Systems and Services

The second part of the Directory gives individual descriptions of the information systems belonging to the organizations listed in Part I. The systems included are those intented to serve member governments and the general public. Systems devoted to the support of organizations' internal functions (for example, accounting, financial management, etc.) are excluded as are those which are entirely of a statistical character. For the latter, the reader is referred to the Directory of International Statistics (Statistical Papers Series M, NO. 56) United Nations, New York, 1975. Services supplying information on United Nations family activities to the press, radio and television are excluded.

The index which precedes Part II gives a full list of the systems included in the Directory.

To assist in referring from one part of the Directory to another, each system has been given a reference consisting of the organization's acronym and reference number combined with the system acronym and reference number. For example: UN 01-01 DHL; UN 01-02 UNBIS, UN 01-03 UNDIS; UN 01-04 MACTIS, etc.

The structure of each entry in part II follows a standard pattern:

(1) The information system reference followed by the full title of the system.
For example: UN 01-01
DAG HAMMARSKJOLD LIBRARY

(2) The next three lines indicate:
- the status of the system: operational, under development, planned, etc. and, if available, the date when the current status commenced.
- the contact point within the organization responsible for supplying the details quoted on each system.
- the type of system as described by the organization.

(3) Input centres are indicated for those systems which have centres or focal points contributing input and the countries in which such centres are located. The addresses of the centres are given in Part III, list B of the Directory. This heading is omitted when a system operates without formal national and regional centres.

(4) Objectives: A summary of what the system plans to achieve.

(5) Scope and Subject Coverage:
- the geographic coverage of the information supplied by the system. Where organizations have indicated no specific limitation, the geographic coverage is described as "worldwide".
- the period coverage of the information supplied by the system. Generally when a system provides for a cumulation of information the period coverage is described as existing since a given year, for example: "since 1960". When a system by the nature of the information stored deals only with current data it is described as such.
- the carrier language used by the system generally refers to the language or languages used for the products and services offered by the system.
- the subject coverage of the system is indicated by a list of terms following the words "provides information on". The list of terms are taken from the 1977 version of the Broad System of Ordering (BSO) prepared by the Federation Internationale de Documentation (FID), for UNESCO/UNISIST. Wherever it appeared to be helpful to the reader the BSO terms have been supplemented by terms suggested by the organizations.
- a list of the principal categories of users which the system is designed to serve.

(6) Information sources indicate the major sources from which the information contained in the system is derived. Where appropriate, the physical volume of the collection of material supporting the operation of the system is also given, as its "back-up literature".

(7) Indexing elements, this entry is subdivided into two parts: (a) the type of indexing tool used, that is, a given thesaurus or classification scheme; (b) the various search elements the system employs to retrieve information.

(8) Services provided describes the regular services provided by the system. These services commonly include the regular publication of bibliographies, indexes, journals, etc. In some cases the system provides more specialized services such as: "searches on request", the undertaking of ad hoc searches for information tailored to particular requirements; or SDI (Selective Dissemination of Information), searches for information on a continuing basis tailored to particular specifications. The nature of the services offered may be "on-line services", providing access to the system files by immediate access devices such as terminals; or "reprographic services", providing photo or other copies of material available in the collections supporting the system. Some systems offer "training in the use of the system" through seminars, training sessions, etc.; or "advisory services" on the ways in which users can best utilize the facilities provided.

(9) Products listed are those offered by the system on a basis (whether in the form of publications or in the form of machine readable material on magnetic tapes for computers).

Part III: Country Index

The third part of the Directory presents addresses by country, to facilitate contact between users and organizations, systems and services.
The addresses supplied under each country are in three groups:
- List A, the addresses of the organizations listed in Part I of the Directory.
- List B, the addresses of input centres or contact points for those systems which have such centres indicated in Part II of the Directory.
- List C, the addresses of United Nations information centres and the addresses of the depository libraries where collections of the publications of certain organizations can be found.

The order of countries is alphabetic based on the names given in the United Nations Standard Country Code (Statistical papers, Series M., No. 49), United Nations, New York, 1970 updated to mid-1977. An index of the countries included precedes Part III of the Directory.

The addresses in lists A and B are given according to the organization or system reference number. In list C, if there is a United Nations information centre its address is given first followed by the addresses of depository libraries in alphabetical order of city.

Part IV: Subject Index

The fourth part of the Directory is a subject index designed to assist users to identify the systems and services which deal with information in a given subject field.

The system of indexing is based on the version of the Broad System of Ordering (BSO) elaborated by the Federation Internationale de Documentation (FID), within the UNISIST programme and with UNESCO support (June 1977).

In order to keep the index as short and concise as possible only those subject terms of the BSO have been quoted which are appropriate to the content of the hundred or so United Nations family information systems described.

How to Use the Directory

To determine the fields of activity of a given organization of the UN family, the user should consult the index to Part I.

To identify which organizations or systems are represented in a given country and the corresponding addresses, the user should consult the index to Part III.

UN information centres and the depository libraries of organizations are also listed by country in Part III. Information on where the publications of United Nations organizations may be purchased can be obtained from the principal offices of the organizations, listed in Part I, or from their country offices, listed in Part III.

To obtain details of a given information system, the user should consult the index to Part II.

If the user wishes to identify the systems relevant to a given problem the most appropriate subject field should be selected in Part IV where the reference to the relevant system or systems described in Part II will be found.

PART I: UNITED NATIONS ORGANIZATIONS

UN.SI

UNITED NATIONS

FUNCTIONS
The purposes of the United Nations are:
- to maintain international peace and security;
- to develop friendly relations among nations;
- to co-operate internationally in solving international economic, social, cultural and humanitarian problems and in promoting respect for human rights and fundamental freedoms;
- to be a centre for harmonizing the actions of nations in attaining these common ends.

Within the Secretariat of the United Nations, the Department of Economic and Social Affairs has as its major functions:
- to assist and advise the Secretary General in guiding the total effort of the United Nations system in matters concerning economic and social development;
- to provide secretariat services for the Economic and Social Council, its commissions and committees, the Second and Third Committees of the General Assembly and subsidiary bodies of the General Assembly dealing with economic and social matters;
- to study and analyse problems of economic and social development, including those relating to the natural resources base of developing countries, population policies and programmes, social welfare and equality of men and women in law and practice;
- to collect and disseminate technical information and to issue publications on the above subjects;
- to assist Governments in improving the effectiveness of national policies and programmes bearing on economic and social development;
- to maintain a central statistical office for the United Nations, to compile for publication statistics of international interest, to advise Governments on statistical matters;
- to administer the United Nations regular programme of technical assistance and to implement UNDP projects for which the United Nations is executing agency.

[redacted]

Functions
The Economic Commission for Europe provides a systematic means of intergovernmental co-operation among European states and the United States and Canada. The four principle objectives of the Commission's work are: the promotion of international trade; scientific and technological co-operation; the improvement of the environment ; and long term programming and projections as a basis for economic policy making. The Commission publishes statistical information on many economic fields and makes regular analyses of the economic situation in the ECE region.
The following list of titles of the Commission's principal subsidiary bodies indicates the broad scope of ECE activities:

Committee on Agricultural Problems
Chemical Industry Committee
Coal Committee
Conference of European Statisticians
Committee on Electric Power
Committee on Gas
Committee on Housing, Building and Planning
Inland Transport Committee
Senior Advisers to ECE Governments on Science and Technology
Senior Advisers to ECE Governments on Environmental Problems
Senior Economic Advisers to ECE Governments
Steel Committee
Timber Committee
Committee on the Development of Trade
Committee on Water Problems

In addition, the Commission assumes direct responsibility for programmes dealing with general energy questions, standardization, automation and engineering questions.

[redacted]

Functions
The principal role of the Economic and Social Commission for Asia and the Pacific is to initiate and participate in measures for facilitating concerted action for the development of Asia and the Pacific, including the social aspects of such development, with a view to raising the level of economic activity and standards of living and for maintaining and strengthening the economic relations of countries and territories in Asia and the Pacific, both among themselves and with other countries in the world.
The Commission also:

- provides substantive services, secretariats and documentation for the Commission and its subsidiary bodies;
- undertakes studies, investigations and other activities within the Commission's terms of reference ;
- provides advisory services to Governments at their request;
- contributes to the planning and organization of programmes of technical co-operation and acts as executing agency for these projects decentralized to it.

UNDRO 07

OFFICE OF THE UNITED NATIONS DISASTER RELIEF COORDINATOR

FUNCTIONS
The Office of the United Nations Disaster Relief Coordinator serves as the focal point of the United Nations system for all disaster matters.
The purpose of UNDRO is to strengthen the collective response of the international community in cases of disasters. The main functions of the Office are the mobilization and co-ordination of disaster emergency relief and the promotion of measures for disaster preparedness and disaster prevention. The Office mobilizes and co-ordinates the relief assistance of the various organizations of the United Nations system and co-ordinates the assistance given by intergovernmental and non-governmental organizations and voluntary agencies in response to requests from countries stricken by disasters. The Office also functions as a clearing-house for information to ensure that all necessary data and information from the disaster site reach potential donors, that is, Member States, the United Nations, specialized agencies, non-governmental organizations and voluntary agencies and to provide information on donor responses to reported needs. UNDRO provides advice to Governments, in co-operation with other institutions and organizations, in measures of pre-disaster planning to ensure the most efficient use of available resources in order to make the total assistance effort of the international community as effective and timely as possible.
UNDRO also promotes the study, prevention, control and prediction of natural disasters, including the dissemination of information concerning technological developments. It provides technical assistance in disaster preparedness and disaster prevention to disaster-prone developing countries. The activities of UNDRO include the implementation of basic preventive measures, the improvement of forecasting and warning systems, and in general, promoting the application of the latest scientific and technological measures in the preventive activities and emergency plans of disaster-prone countries.

WFC; FAO

WORLD FOOD COUNCIL (UN/FAO)

FUNCTIONS
The World Food Council is an organ of the United Nations, reporting to the General Assembly through the Economic and Social Council. The World Food Council is responsible for co-ordinating and follow-up policies concerning food production, nutrition, food security, food trade and food aid and other related matters by all the agencies of the United Nations system.
The main functions of the Council are:

- to monitor all aspects of the world food situation including the action taken by international organizations and Governments to develop short and long term solutions to food problems;
- to identify malfunctions, gaps and problem areas and to use its co-ordinating role to develop feasible world food strategies;
- to make recommendations to the General Assembly in order to use the political influence of the United Nations to bring about desired results.

UNCTAD 09

UNITED NATIONS CONFERENCE ON TRADE AND DEVELOPMENT

FUNCTIONS
The principal purposes of the United Nations Conference on Trade and Development are:
- to help developing countries to expand their trade and thereby obtain increasing resources essential for their self-sustained growth;
- to promote convergent policies concerning trade, aid, and related areas;
- to secure remunerative, equitable and stable prices for primary products of developing countries and to improve access of these products to the markets in industrialized nations;
- to increase the exports of manufactured and semi-manufactured products of developing countries;
- to help the developing countries to strengthen their technological capacity by way of improving institutional infrastructure at national, regional and interregional levels, improving cooperation among developing countries as well as from the developed countries and rendering technical and operational assistance to developing countries.

UNCTAD's work includes the consideration of ways of increasing the net flow of financial resources to developing countries, particularly disbursements of official development assistance. In this context, UNCTAD makes recommendations designed to improve the terms and conditions of aid, to reduce the rising burden of debt service and elaborate an international monetary system better adapted to the needs of developing countries. One of UNCTAD's continuing objectives is the promotion of trade among countries having different economic and social systems, such as the expansion of East-West trade, as well as, the expansion of trade between developing countries and socialist countries of Eastern Europe and Asia. In order to overcome the special handicaps of the poorest countries and to enable them to take advantage of general international measures for development, UNCTAD has recommended special measures for these least developed among the developing countries. As a participating and executing agency of the United Nations Development Programme, UNCTAD is responsible for technical assistance activities in all matters related to trade.
UNCTAD together with other UN organizations helps in establishing national and regional centres for transfer and development of technology, which are to play an important role, inter alia, in the field of information exchange.

UNIDO 10

UNITED NATIONS INDUSTRIAL DEVELOPMENT ORGANIZATION

FUNCTIONS

The principal purpose of the United Nations Industrial Development Organization is:

- to promote industrial development by encouraging the mobilization of national and international resources, to assist, promote and accelerate the industrialization of the developing countries with particular emphasis on the manufacturing sector;
- to advise and assist governments of developing countries in formulating industrial development programmes and policies, in building and strengthening institutional infrastructure for industrial development and in preparing and implementing specific projects in various industrial sectors.

UNIDO provides direct assistance in industrialization to developing countries, at their request, through operational activities, including measures to achieve more rapid industrialization and the effective application of modern methods of industrial production, programming and planning, and the establishment and strengthening of institutions and administration. UNIDO co-operates with regional economic commissions in industrial development planning, with particular attention to the needs of the developing countries.

UNEP 11

UNITED NATIONS ENVIRONMENT PROGRAMME

FUNCTIONS

The functions of the United Nations Environment Programme are:

- to provide, through interdisciplinary study of natural and man-made ecological systems, improved knowledge for an integrated and rational management of the resources of the biosphere;
- to encourage and support an integrated approach to the planning and management of natural resources so as to take account of environmental consequences in order to achieve maximum social, economic and environmental benefits;
- to assist all countries, especially developing countries, to deal with their environmental problems;
- to help mobilize additional financial assistance with a view to promoting the full participation of developing countries in international activities for the preservation and enhancement of the environment.

UNICEF 12

UNITED NATIONS CHILDREN'S FUND

FUNCTIONS
UNICEF is a fund set up to pay special attention to the needs of children through worldwide participation in developmental programmes and emergency measures. UNICEF co-operates in social, technological, and production endeavours particularly focusing on basic needs in rural communities and slums. Projects in health, education, agriculture, communication, information, public administration, water, and community development are supported. UNICEF is also directly promoting a better understanding of the needs of children and supports measures which lead to activities and institution building in favour of children.

UNDP 13

UNITED NATIONS DEVELOPMENT PROGRAMME

FUNCTIONS

The function of the United Nations Development Programme is to provide central co-ordination for multilateral pre-investment and technical assistance activities within the UN system. UNDP supports the efforts of low-income countries to develop their natural resources and human capabilities and to attract the capital needed for financing economic, technological and social progress. To this end, UNDP supports projects in agriculture, industry, education, power production, transport, communications, health, public administration, housing, trade and related fields. UNDP technical assistance activities also include the promotion of technical co-operation among developing countries.

WFP 14

WORLD FOOD PROGRAMME (UN/FAO)

FUNCTIONS
The function of the World Food Programme is to provide a means for the provision of food as aid to developing countries both to promote economic and social development and to help alleviate emergency situations.
WFP provides food as aid to a wide range of economic and social development projects. First priority is given to special hardship areas, to nutrition projects for pregnant women, nursing mothers and young children and to projects which contribute to increasing agricultural production, particularly food production.

UNHCR 15

OFFICE OF THE UNITED NATIONS HIGH COMMISSIONER FOR REFUGEES

FUNCTIONS
The functions of the Office of the United Nations High Commissioner for Refugees are to provide international protection for refugees and to seek permanent solutions to their problems through voluntary repatriation, resettlement in other countries or integration into the country of present residence. UNHCR may also be called upon to provide emergency relief and supplementary aid as necessary. UNHCR aims to encourage the conclusion of inter-governmental legal instruments in favour of refugees and to encourage governments to adopt legislation and administrative procedures for the benefit of refugees.

UNU 18

UNITED NATIONS UNIVERSITY

FUNCTIONS
The functions of the United Nations University are:
- to carry out programmes for world hunger, human and social development, and the utilisation and management of natural resources;
- to help identify and define global problems that scholars can help alleviate;
- to organize internationally co-ordinated research and advanced training to fill important gaps in knowledge and expertise concerning them;
- to strengthen research and advanced training resources in developing countries where global problems are often most seriously manifested;
- to disseminate research results both to scholars throughout the world and to decision makers in forms which they can readily use;
- to encourage mission-oriented multidisciplinary research and training methods that facilitate practical applications of research findings.

ITC 19

INTERNATIONAL TRADE CENTRE (UNCTAD/GATT)

FUNCTIONS

The International Trade Centre is an organization jointly sponsored by UNCTAD and GATT for the provision of technical assistance in trade promotion mainly to developing countries. The activities of ITC include the provision of assistance:

- to enable governments to improve their national trade promotion institutions;
- to build up specialized export promotion services in the government and business sectors;
- to identify the export potential of products on the basis of which export promotion activities will be carried out;
- to identify the export possibilities of selected products in world markets through market research;
- to exploit these opportunities through export marketing and sales promotion activities;
- to encourage the formulation and implementation of multinational efforts by exporting countries to expand the consumption of certain basic commodities;
- to train government trade officials, business export executives and instructors in all aspects of trade promotion and international marketing.

ILO 51

INTERNATIONAL LABOUR ORGANISATION

FUNCTIONS
The functions of the International Labour Organisation are to raise working and living standards throughout the world. To this end the ILO sponsors international programmes aimed at achieving :
- full employment and the raising of living standards;
- employment of workers in jobs for which they are best fitted;
- the provision of facilities for training and transfer of workers, including migration for employment and settlement;
- policies in regard to wages and earnings, hours and other conditions of work calculated to assure a just share of the fruits of progress for all, and a minimum living wage to all employed and in need of such protection;

- the effective recognition of the right to collective bargaining, the co-operation of management and labour in the improvement of productive efficiency, and the collaboration of workers and employers in the preparation and application of social and economic measures;
- the extension of social security;
- the protection of the worker's life and health;
- the provision for child welfare and maternity protection;
- the provision of adequate nutrition, housing and facilities for recreation and culture;
- the assurance of equality of educational and vocational opportunity.

FAO 32

FOOD AND AGRICULTURE ORGANIZATION OF THE UNITED NATIONS

FUNCTIONS
The principal functions of the Food and Agriculture Organization of the United Nations are:

- to help raise the levels of nutrition and the standards of living;
- to improve production and distribution of agricultural products;
- to better the conditions of rural populations.

FAO, in support of its principal functions:

- provides an intelligence service, including not only facts and figures relating to nutrition, agriculture, forestry and fisheries, but also appraisals and forecasts of production, distribution and consumption in these fields;
- promotes national and international action to improve production, marketing, processing and distribution of the products of agriculture (including fisheries and forestry), conservation of natural resources, and credit and commodity arrangement policies;
- furnishes on request, technical assistance in any of the above fields;
- helps countries obtain investment for agricultural development.

UNESCO 17

UNITED NATIONS EDUCATIONAL, SCIENTIFIC AND CULTURAL ORGANIZATION

FUNCTIONS
The main objective of the United Nations Educational, Scientific and Cultural Organization is to contribute to peace and security in the world by promoting collaboration among nations through education, science and culture in order to further universal respect for justice, for the rule of law, and for the human rights and fundamental freedoms which are affirmed for the people of the world, without distinction of race, sex, language or religion, by the Charter of the United Nations.
In support of this objective UNESCO's principal functions are:
- to collaborate in the work of advancing the mutual knowledge and understanding of peoples through all means of mass communication;
- to give fresh impetus to popular education and to the spread of culture;
- to encourage the teaching and understanding of sciences.

Major programme activities include a literacy drive, teaching about the United Nations and human rights, compulsory education and the raising of educational standards, exchange of persons and provision of scientific and educational experts on request to Member States. Programme activities are carried out through national commissions.

The General Information Programme (UNISIST) is designed to provide a conceptual framework for information system development. It covers basically the activities of UNESCO in the field of scientific and technical information and documentation, library and archives.

WHO 26

WORLD HEALTH ORGANIZATION

FUNCTIONS
The objective of the World Health Organization as "the attainment by all peoples of the highest possible level of health"; health, as defined in the WHO Constitution, as "a state of complete physical, mental and social well-being and not merely the absence of disease or infirmity".
In support of its main objective, the Organization has a wide range of functions, including the following:

- to act as the directing and coordinating authority on international health work;
- to promote technical cooperation;
- to assist Governments, upon request, in strengthening health services;
- to furnish appropriate technical assistance and, in emergencies, necessary aid, upon the request or acceptance of Governments;
- to stimulate and advance work on the prevention and control of epidemic, endemic and other diseases;
- to promote, in cooperation with other specialized agencies where necessary, the improvement of nutrition, housing, sanitation, recreation, economic or working conditions and other aspects of environmental hygiene;
- to promote and coordinate biomedical and health services research;
- to promote improved standards of teaching and training in the health, medical and related professions;
- to establish, and to stimulate the establishment of international standards for biological, pharmaceutical and similar products, and to standardize diagnostic procedures;

- its Position statements on the fields of dental health, especially those activities affecting the harmony of human relations.

WHO also prepares conventions, agreements, regulations, and makes recommendations about international nomenclature of diseases, causes of death, and public health practices. It develops, establishes and promotes international standards concerning foods and biological, pharmaceutical and similar substances.

WMO [1]

WORLD BANK GROUP

FUNCTIONS

The World Bank Group consists of three international financial institutions: the International Bank for Reconstruction and Development, (IBRD) the International Development Association (IDA) and the International Finance Corporation (IFC). Each of these three institutions was established to fulfill a distinct function but all are devoted to the provision of financial and technical assistance for economic development.

The main functions of the World Bank Group are:
- to facilitate the investment of capital for productive purposes, particularly the development of productive facilities and resources in developing countries;
- to promote private foreign investment by guarantees or participation in loans and other investments made by private investors; and when private capital is not available on reasonable terms;
- to supplement private investment by providing, on suitable terms, finance for productive purposes;
- to promote the long-range balanced growth of international trade and the maintenance of equilibrium in balances of payments by encouraging international investment for the development of the productive resources of members, thereby assisting in raising productivity, the standard of living and conditions of labour in their territories;
- to arrange the most useful and urgent projects, with first priority to the most important and urgent projects, whether large or small alike;
- to conduct its operations with due consideration for the effect of international investment on business conditions in the territories of members and, in view of its guarantees, to use its influence to encourage a flow of international investment of such character as to conform with the needs and conditions of the country concerned;
- to act in accordance with sound banking principles and practices.

IBRD 7a

[redacted]

Functions
The main functions of the International Monetary Fund are:
- to promote international monetary cooperation through a permanent institution which provides the machinery for consultation and collaboration on international monetary problems;
- to facilitate the expansion and balanced growth of international trade;
- to promote exchange stability, to maintain orderly exchange arrangements among members and to avoid competitive exchange depreciation;
- to assist in the establishment of a multilateral system of payments in respect of current transactions between members and in the elimination of foreign exchange restrictions;
- to give confidence to members by making the Fund's resources temporarily available to them under adequate safeguards, thus providing them with an opportunity to correct disequilibria in their balance of payments without resorting to measures destructive to national or international prosperity;
- to shorten the duration and lessen the degree of disequilibrium in the international balance of payments of members.

ICAO 33

INTERNATIONAL CIVIL AVIATION ORGANIZATION

FUNCTIONS
The aims and objectives of the International Civil Aviation Organization are to develop the principles and techniques of international air navigation and to foster the planning and development of international air transport so as to :

- insure the safe and orderly growth of international civil aviation throughout the world;
- encourage the arts of aircraft design and operation for peaceful purposes;
- encourage the development of airways, airports, and air navigation facilities for international civil aviation;
- meet the needs of the peoples of the world for safe, regular, efficient and economical air transport;
- prevent economic waste caused by unreasonable competition;
- insure that the rights of contracting States are fully respected and that every contracting State has a fair opportunity to operate international airlines;
- avoid discrimination between contracting States;
- promote safety of flight in international air navigation;
- promote generally the development of all aspects of international civil aeronautics.

UPU 50

UNIVERSAL POSTAL UNION

FUNCTIONS
The Universal Postal Union is responsible for developing communications between peoples by the efficient operation of the postal services and thereby contributing to the attainment of international collaboration in the cultural, social and economic fields. The aim of the UPU is to secure the organization and improvement of the postal services and to promote in this sphere the development of international collaboration. In addition, it provides, within the limits of its resources, the postal technical assistance sought by its member countries. To these ends, the UPU works both through its formally constituted organs and directly between the postal administrations of member countries.

IMCO 61

INTER-GOVERNMENTAL MARITIME CONSULTATIVE ORGANIZATION

FUNCTIONS
The Inter-Governmental Maritime Consultative Organization is concerned with shipping and maritime affairs.
The main objectives of IMCO are to promote international co-operation on technical matters related to the safety of shipping, to facilitate maritime traffic, and prevent marine pollution from ships. These objectives are achieved by the formulation of international conventions, codes of practice, and recommendations which by providing a basis for legislation in member countries, prevent the proliferation of a variety of possibly contradictory national standards. In addition, IMCO also provides technical, legal and other assistance to developing nations.

IAEA 63

INTERNATIONAL ATOMIC ENERGY AGENCY

FUNCTIONS

The main functions of the International Atomic Energy Agency are:

- to accelerate and enlarge the contribution of atomic energy to peace, health and prosperity throughout the world;
- to ensure that assistance provided by it or at its request or under its supervision or control is not used in such a way as to further any military purpose.

The IAEA also aims:

- to encourage and assist research on atomic energy for peaceful purposes throughout the world;
- to act as an intermediary in the supply of materials, services, equipment and facilities;
- to foster the exchange of scientific and technical information;
- to encourage the exchange and training of scientists and experts;
- to establish and administer safeguards against the misuse of aid provided by or through the Agency;
- to establish safety standards.

GATT 64

GENERAL AGREEMENT ON TARIFFS AND TRADE

FUNCTIONS

The General Agreement on Tariffs and Trade is a multilateral treaty, subscribed to by 83 governments and applied in practice by a further 28 which together account for more than four-fifths of world trade. It is the only multilateral instrument that lays down agreed rules for international trade. GATT also functions as the principal international body concerned with negotiating the reduction of trade barriers and with international trade relations. A basic principle of the General Agreement is that member countries should consult with one another on trade problems, such consultation is a major and continuing part of GATT's work. Among the means used for dispute settlement are independent Panels of Conciliation. In recent years the field of trade in textiles has been regulated by the Arrangement Regarding International Trade in Textiles , the Multifibre Arrangement , negotiated under GATT auspices.

IFAD 65

INTERNATIONAL FUND FOR AGRICULTURAL DEVELOPMENT

FUNCTIONS

The main function of the International Fund for Agricultural Development is to mobilize additional resources to be made available on concessional terms for agricultural development in developing Member States. IFAD provides financing primarily for projects and programmes specifically designed to introduce, expand or improve food production systems and to strengthen related policies and institutions within the framework of national priorities and strategies. In allocating resources, the Fund is guided by the need to increase food production and to improve the nutritional level of the poorest populations in the poorest food-deficit countries and by the potential for increasing food production in other developing countries with the emphasis of improving the nutritional level of the poorest populations in these countries and the conditions of their lives. Eligibility for assistance is on the basis of the objective economic criteria of efficiency and cost- effectiveness combined with the social criteria of equity and equality of opportunity. The Fund places special emphasis on the needs of the low income countries and their potential for increasing food production. The lending policies and criteria of the Fund address both the supply and demand side of food production but, at the same time, stress the urgent need to expand the incomes and employment of the poorest people.

OBJECTIVES
to carry out the collection, storing and retrieval of information related to currently produced documents, reports and publications in the field of FAO's competence.To develop a worldwide network of AGRIS centres in charge of collecting, processing, and disseminating information on current agricultural literature in accordance with agreed standards and methods under the co-ordination of FAO and to ensure systems support and staff training to these centres through technical assistance and othe means. AGRIS/1 is a decentralised system, with FAO as the co-ordinating centre responsible for receiving, integrating and processing bibliographic data submitted by national and regional input centres over the world.

SCOPE AND SUBJECT COVERAGE
geographic coverage worldwide; period coverage unlimited; carrier language English, original language titles retained.
Provides information on: agricultural chemicals technology; agriculture, farming; agronomy, crops and soil; animal husbandry, livestock farming; botany, plant biology; ecology, environmental biology; economics, industry and trade; environment and nature conservation; food, drinks and stimulants technology; fishing and fisheries; forestry; geography; geology; household science and human needs services; human geography; natural resources; physical geography; rock, soil and mineral sciences; zoology, animal biology.
Servicing: primary users are network centres who both collect and use data to answer questions; secondary users are administrators, planners, decision makers, teachers, students, financiers, industrialists, extention workers, research specialists and farmers.

INFORMATION SOURCES
monographs, serials, reports, patents, standards, dissertations, proceedings, trade catalogues, laws and regulations, unpublished documents. 160,000 items available to system; 77,000 added as of April 1977. Back-up literature: held at the input centres, except small portion of unpublished documents, which are submitted to AGRIS co-ordinating centre for microfiching; all mocrofiched items available to users through the World-Wide Network of Agricultural Libraries (AGLINET).

SEARCH ELEMENTS
UN organization, corporate entry, publications number, geographic region: geographical names are rendered in code, country, title, personal author, institution, conference, report, standard, patent number, subject matter and commodities.

SERVICES PROVIDED
regular services include indexes; supplementary services will include searches on request and SDI at AGRIS centres, on-line services at those AGRIS centres with computer service, question/answer service at AGRIS centres, training in use of system and advisory service on system at AGRIS co-ordinating centre.

PRODUCTS
AGRINDEX: index of publications, entries arranged by publications and subject categories and within a subject category by commodities. Cumulations of personal author index, corporate entry index, subject and commodities index, report and patent number index; in English with original language titles of documents; issued 12 x yr. Publisher: International Beekeeping Technology and Economy Institute of APIMONDIA, 20 Pitar St., 7000 Bucharest, Romania. Also available at AGRIS Co-ordinating Centre, FAO, Rome, and at AGRIS Liaison offices.
AGRIS Output Tape: cumulations of personal author index, corporate entry index, commodities index, report and patent number index: in English, with original language titles of documents: issued 12 x yr. Publisher: AGRIS Co-ordinating Centre, FAO. Price on request.

OBJECTIVES
to collect, store and make available information on agricultural research institutions, stations, research workers and research programmes and projects in developing countries. To develop a worldwide information system on agricultural research in developing countries through a network of regional and national CARIS centres and to develop liaisons with similar information systems in developed countries.

SCOPE AND SUBJECT COVERAGE
geographic coverage worldwide; especially developing countries; period coverage since 1975; carrier language English, French, Spanish.
Provides information on: research institutions, research workers, research programmes, and research projects in: agricultural chemicals technology; agriculture farming; agronomy, crops, soil; animal husbandry; environment and nature conservation; fishing and fisheries; food, drinks and stimulants technology; food and nutrition; human ecology and environment; household science and human needs services; natural resources; veterinary science, veterinary medicine; wildlife exploitation.
Servicing: Member States, national and international research institutes, research workers and scientists.

INFORMATION SOURCES
questionnaires on institutions, researchers and programmes as submitted by input centres.35,000 items available to system on 2000 institutions, 10,000 researchers, 3,500 programmes, 20,000 projects as of 1977. Back-up literature: only available at national CARIS centres.

INDEXING and/or CLASSIFICATION TOOLS

COMPUTER SYSTEM FOR CROP RESPONSE TO FERTILISERS

Operational since 1972 ; computer assisted.
Fertilizer Programme, FAO.
Type of system: information analysis, data bank.

OBJECTIVES
to analyse fertilizer demonstrations and trials results to determine the economics value of different treatments at variable cost value levels.

SCOPE AND SUBJECT COVERAGE
geographic coverage worldwide, however, at present covering only Madagascar, Lesotho, Zaire, Burrundi, Upper Volta, Nigeria, United Republic of Tanzania, Ethiopia, Sudan, Philippines, Bangladesh, Indonesia, Thailand, Pakistan, Brazil, Peru; period coverage since 1972; carrier language English.
Provides information on: crop yields; crop responses to fertilizers; economic value of fertilizers; soils; climate; vegetation.
Servicing: Fertiliser Programme Unit Headquarters and field staff, FAO and national field specialist for fertilizer application on crops.

INFORMATION SOURCES
Survey data from FAO field staff, 1 item equals 1 crop/site information. 15,000 items available to system; at least 5,000 added in each year.

SEARCH ELEMENTS
country, climate data, soil type data, geographic location.

SERVICES PROVIDED
regular services include economic balance tables for fertilizer application and crop-fertilizer response functions, computed by regression analysis of site and crop and type of fertilizer, distributed to project technicians, for use by government decision makers, to form part of their annual reports: Review of Trials and Demonstrations, which is distributed to UN agencies, member countries and national research institutions.

PRODUCTS
FAO Fertilizer Programme, Review of Trials and Demonstration Results : computer output tables of trial and demonstrations for selected countries; in English; issued 1 x yr. Publisher: FAO. Cost free to soil-fertility specialists.

FAO AGRICULTURAL INFORMATION STORAGE AND RETRIEVAL SYSTEM

Operational since January 1976; computer assisted.
Library and Documentation Systems Division, FAO.
Type of system: bibliographic, information analysis, library.

OBJECTIVES
to collect, store and retrieve descriptions and abstracts of FAO publications and documents, reports of FAO field projects, and world literature received by the FAO library, in order to make more readily available their technical and scientific content; to serve as a model documentation centre for FAO technical assistance projects concerned with the establishment of national agricultural documentation centres in developing countries.

SCOPE AND SUBJECT COVERAGE
geographic coverage worldwide; period coverage since 1945; carrier language English, original language titles retained.
Provides information on: agricultural chemicals technology; agriculture, farming; agronomy, crops and soil; animal husbandry, livestock farming; botany, plant biology; ecology, environmental biology; economics, industry and trade; environment and nature conservation; fishing and fisheries; food and nutrition; food, drinks and stimulants technology; human geography; natural resources; physical geography; rock, soil and mineral sciences; zoology, animal biology.
Servicing : Member States, UN and UN agencies, international and national bodies, FAO staff and field personnel and any other interested bodies.

INFORMATION SOURCES
monographs, serials, reports, proceedings, unpublished documents. 54,000 items available to system; 6,000 items added in last year. Back-up literature : over 1,000,000 monographs, 10,000 serials titles, 150,000 unpublished documents of which approx. 2,500 items are restricted.

INDEXING and/or CLASSIFICATION TOOLS
own thesaurus of 12,000 terms.

SEARCH ELEMENTS
UN organization, corporate entry, publication number, geographic region, country, title, personal author, institution, conference, report, standard.

SERVICES PROVIDED
services include bibliographies, indexes, catalogues; supplementary services include searches on request on a weekly batch basis, question/answer service, reprography, loans; SDI and on-line services planned.

PRODUCTS
Cumulative Catalogue of Monographs: in English, original language titles retained; issued 1 x yr; index issued 1 x m. Publisher: FAO. Cost free. Restricted to main agricultural libraries and institutes, FAO regional offices, UN resident representatives, specialized agencies. Available at FAO Headquarters and regional offices for consultation only.
FAO Documentation Current Bibliography: index issued 1 x m, cumulated 1 x yr; in English, original language titles retained. Publisher: FAO. Cost free. Restricted items of data base maintained in separate issue of bulletin and distributed to FAO headquarters, regional and field staff, country representatives, and UNDP resident representatives only.
List of Selected Articles: in English; issued 1 x m. Publisher: FAO. Cost free. Restricted to FAO headquarters and technical field staff.
Special Indexes: short catalogue indexes, KWOC index; issued irregularly cumulated irregularly. Publisher: FAO. Price on request.

FILM LOAN LI[illegible]Y

Operational since 1961; wholly manual.
Information Division, FAO. Joint operation with WFP.
Type of system: specialised library.

OBJECTIVES
to establish a repository of films on FAO subject matter and to serve as exchange system for educational and informational films produced by Member States on relevant subject matter.

SCOPE AND SUBJECT COVERAGE
worldwide contribution to input; period coverage since 1947; carrier language English, French, Spanish.
Provides information on: agricultural chemicals technology; agriculture, farming; agronomy, crops and soil; animal husbandry, livestock farming; economics, industry and trade; environment and nature conservation; fishing and fisheries; food and nutrition; food, drinks and stimulants technology; forestry; wildlife exploitation.
Servicing: Member States, cooperatives, planners of agricultural and rural development, training colleges, farming groups, UN organizations, FAO staff.

SEARCH ELEMENTS
title, distributor, subject.

INFORMATION SOURCES
audio visual material: black and white and colour films. 1300 items available to system; 80 added in last year.

SERVICES PROVIDED
regular services include black and white and colour films: 16 mm sound; in original language with English subtitles. Free loan, purchase prices vary; catalogue listing films available on loan with short description of film, includes list of producers and distributors with addresses.

WORLD FISHING CATCH DATA BASE

Operational since August 1974 ; computer assisted.
Department of Fisheries Policy and Planning Service and Fisheries Statistical Unit, FAO.
Type of system: data bank.

OBJECTIVES
to maintain data on total catch by country, area fished and year fished, for commercially valuable species.

SCOPE AND SUBJECT COVERAGE
geographic coverage worldwide ; period coverage since 1970 ; carrier language English.
Provides information on: deep-sea fisheries; fisheries and fishing grounds of particular countries; fishing and fisheries; freshwater, river and lake fisheries; inshore and offshore fisheries; sea fisheries.
Servicing : fishery scientists and administrators.

INFORMATION SOURCES
national questionnaires. 40,000 items available to system; 6000 items included in last year.

GENETIC RESOURCES COMMUNICATION, INFORMATION AND DOCUMENTATION System

Operational since 1976 ; computer assisted.
Crop Ecology and Genetic Resources Unit, Plant Production and Protection Division, FAO. Joint operation with: International Board for Plant Genetic Resources, and the Information Sciences and Genetic Resources Programme, University of Colorado, 1239 University Avenue, Boulder, Colorado 80309, USA.
Type of system: information analysis, data bank.

OBJECTIVES
to carry out the recording and retrieval of genetic data with reference to different crops and areas in order to improve the use of information required by genetic conservation centres and plant breeding institutes working on the development of new crop varieties; to develop a network of genetic resources centres, where the role of FAO would be to exercise the function of coordinating, monitoring, guiding and supporting the introduction and use of a data base on genetic resources information.

SCOPE AND SUBJECT COVERAGE
geographic coverage worldwide ; carrier language English, French, Spanish.
Provides information on : agronomy, crops and soil; botany, plant biology; forestry; plant pathology.
Servicing : genetic resources research centres, research administrators and planners.

INFORMATION SOURCES
monographs, serials, reports, unpublished documents of crop profiles with genetic characteristic data elements for various crop collections. 120,000 items available to system; 60,000 added in last year.

INDEXING AND/OR CLASSIFICATION TOOLS
own thesaurus.

SEARCH ELEMENTS
geographic region, country, institution.

SERVICES PROVIDED
regular services include occasional reports in the form of catalogues, technical bulletins and newsletters; supplementary services include searches on request, training in use of system, advisory service on system provided by the University of Colorado.

INVENTORY OF CONTAMINANTS IN AQUATIC ORGANISMS

Operational since January 1977 ; computer assisted.
Department of Fisheries, Fisheries Industry and Resources Division and Fishery Data Centre, FAO.
Type of system: international register.

OBJECTIVES
To record and store data on the work carried out on projects involving contaminants in aquatic organisms so as to enable analyses by host and contaminant.

SCOPE AND SUBJECT COVERAGE
geographic coverage worldwide ; period coverage since 1976 ; carrier language English.
Provides information on: aquatic animals, freshwater and marine; disruption of the ecological balance; ecology, environmental biology; environment and nature conservation; environment education and instruction; environment policy, national and regional; fishing and fisheries; inorganic chemistry and compounds; organic chemistry and compounds; water pollution.
Servicing : scientists, research programme administrators.

INFORMATION SOURCES
questionnaires. 1500 items available to system; 500 items added in last year.

INTERLINKED COMPUTERIZED SYSTEM FOR FOOD AND AGRICULTURAL STATISTICS

Operational since 1977 ; computer operated.
Statistics Division, FAO.
Type of system: data bank.

OBJECTIVES
To establish consistent basic and derived data of food, agriculture, fishery and forestry commodities, by country; to assist governments and institutions concerned with agricultural development by providing analyses of data; to provide the above for better data dissemination and further the improvement of data at the country level; to use data to prepare periodicals and other FAO publications.

SCOPE AND SUBJECT COVERAGE
Geographic coverage worldwide ; period coverage since 1961 ; manual language English, some French and Spanish.
Provides information on : statistical analysis, analytical statistics, statistical data and handling by : human population, crops and livestock production, livestock numbers, agricultural machinery, pesticides, fertilizers, land use and utilization, fishery and forestry commodities and related commodity production, trade and utilization data.
Servicing: Member States, international organizations, statistical institutions.

INFORMATION SOURCES
Bibliographic, periodic, re-data, trade catalogues, unpublished documents (questionnaires) and FAO publications. 1,000,000 items available to system; 10,000 added last year.

SEARCH ELEMENTS
geographic region, country, commodity, element (production, trade, utilization, etc.), year.

SERVICES PROVIDED
Regular services include publications; supplementary services include CD of national statistical tables.

PRODUCTS
Agricultural Production Yearbook: contains production indices and annual data on landuse and irrigation, population, crops, livestock numbers, products and means of production ; in English, some French, and Spanish ; issued 1 a yr. Price on request.
Agricultural Production Yearbook Tape: issued 1 a yr. Price on request.
Agricultural Trade Yearbook : contains annual data on trade of agricultural products and agricultural machinery, also trade indices ; in English, some French, Spanish; issued 1 a yr. Price on request.
Agricultural Trade Yearbook Tape: issued 1 a yr. Price on request.
Annual Fertilizer Review: contains annual data on production consumption, trade and available supply of fertilizers, consumption indicators, fertilizer prices, development, capacity and forecast and the state of fertilizers ; in English, some French, Spanish ; issued 1 a yr. Price on request.
Food Balance Sheets: coverage are 1972-76 available by December 1977 ; by country, supply and utilization data per capita consumption; in English, French, Spanish; issued every 5 yrs from 1977; cost free.
Monthly Bulletin of Agricultural Statistics: contains statistical tables on crop, livestock products for production, trade and prices ; in English, French, Spanish ; issued 1 a m. Price on request.
Yearbook of Forest Products, Trade and Production: contains annual data on the production issued 1 a yr. Price on request.
Yearbook of Forest Products Tape: issued 1 a yr. Price on request.
Publication: FAO.

GLOBAL INFORMATION AND EARLY WARNING SYSTEM ON FOOD AND AGRICULTURE

Operational since April 1975; computer assisted (mini computer).
Commodities and Trade Division, FAO.
Type of system: information analysis.

OBJECTIVES
to monitor on a continuous basis the world food supply and demand conditions, in order to assist governments in taking timely and appropriate measures; to identify countries or regions where serious food shortages and worsening nutritional conditions are imminent and to assess possible emergency food requirements. The system is also a major element in the International Undertaking on World Food Security.

SCOPE AND SUBJECT COVERAGE
geographic coverage worldwide; period coverage current year, preceding year and coming season; carrier languages English, French, Spanish.
Provides information on: agriculture, farming: agronomy, crops and soil: economics, industry and trade; food and nutrition; weather analysis, production forecasts.
Servicing: FAO Member States, cooperating international organizations, food aid donors, the general public.

INFORMATION SOURCES
monographs, serials, reports from field officers and participating governments. Back-up literature: monographs, serials, reports and unpublished documents maintained in the FAO Library and the Commodities and Trade Division.

SEARCH ELEMENTS
country, name, commodity.

PRODUCTS
Food Aid Bulletin: in English, French, Spanish; issued quarterly. Publisher: Food Information Group, Commodities and Trade Division, FAO. Cost free.
Food Outlook Reports: periodic reassessment of the food supply and demand outlook in view of changes in production prospects, prices, policies, sales, stocks, demand and other relevant factors; in English, French, Spanish; issued monthly. Publisher: Food Information Group, the Commodities and Trade Division, FAO. Cost free.

UNESCO INTERNATIONAL CENTRE FOR TERMINOLOGY

Operational since 1971.
Division of the General Information Programme, UNESCO. Joint operation with the Austrian Standards Institute in Vienna, Austria.
Type of system: terminological data bank.

OBJECTIVES
- Collection and analysis of terminological publications from all over the world, particularly of terminological standards and principles and of specialized dictionaries.
- Preparation of bibliographies of vocabularies.
- Information on terminological literature and - as far as possible - on their holdings.
- Extensive dissemination of information on terminological publications which are already in existence or are in preparation.
- Information on terminological sources providing advice to institutions, particularly in developing countries, where terminological projects are being undertaken.
- Investigation into the possibility of interconnection of terminological data banks.

SCOPE AND SUBJECT COVERAGE
Geographic coverage worldwide; covers all fields of science and technology.
Servicing: information centres, libraries, subject specialist etc...

INFORMATION SOURCES
Collection of terminological publications from all over the world, particularly of terminological standards and principles and of specialized libraries.

SERVICES PROVIDED
Dissemination of information on terminological publications, information on terminological sources, consultancy services.

PUBLICATIONS
International Bibliography of Standardized Vocabularies.
World Guide to Terminological Activities.

UNISIST CLEARING HOUSE FOR TRENDS AND CLASSIFICATIONS

Operational since 1968.
A division of the General Information Programme, UNESCO. Joint operation with the Polish Institute for Scientific, Technical and Economic Information (ICSTE) Warsaw, Poland.
Type of system: clearing-house, referral centre.

OBJECTIVES
to collect, process and disseminate information on thesauri, classification systems and schemes, descriptor, key-word and subject-heading lists.

SCOPE AND SUBJECT COVERAGE
coverage worldwide, all languages, all fields of knowledge.
servicing: information centres, libraries.

INFORMATION SOURCES
Collection of thesauri, classification schemes, descriptor lists, subject headings lists.

SERVICES PROVIDED
information on the collected material.

PUBLICATIONS
Bibliographic Bulletin of the Clearing House at ICSTE, with annual supplements, in English.
Publication ICSTE.

Information Systems Programme, WHO.
Type of system: clearing house and referral.

Input Centres: see Part III list B
regional centres contributing to input
Congo
Denmark
Egypt
India
Philippines
USA

OBJECTIVES
to serve as the initial point for information about WHO's Special Purpose Information Sub-Systems (see representative examples below) developed and maintained by various WHO technical programmes; to serve as the WHO contact point with similar information services in other agencies and organizations; and to systematically and efficiently collect, analyse and disseminate management information about WHO's programmes and projects to aid the Organization at all echelons with programme planning and the decision making process.

REPRESENTATIVE EXAMPLES OF INFORMATION SUBSYSTEMS OF WHO CONTAINING TECHNICAL AND SCIENTIFIC INFORMATION

- Physicians and Nurses Migration
- Working Guide for the Primary Health Worker
- International Health Regulations
- Malaria Model/Entomology Information
- Schistosomiasis Control in man-made Lakes
- Excess Deaths from Influenza, Pneumonia and Bronchitis
- Immunization and Chemotherapy in Leprosy Research
- Survey of Rabies Occurrence
- Evaluation and Testing of New Insecticides
- Oncological Nomenclature
- Cardio-Vascular Disease Morbidity Reporting
- Caries Etiology
- Collaborative Research on Prevalence and Natural History of Specific Mental Disorders
- International Monitoring of Adverse Reactions to Drugs
- International Pharmacopoeia
- International Biological Standards
- Progress in Water Supply and Waste Water Disposal Provision Activities
- Environmental Health Criteria
- Food Standards
- World Health Statistical Data Collection and Dissemination
- International Classification of Diseases
- Health Manpower Information
- Health Literature Services

SCOPE AND SUBJECT COVERAGE

geographical coverage worldwide; period coverage from 1976; carrier languages English, French. Provides information on: statistical analysis; statistical data and handling; information generation, availability, documentation, information and document handling; management; organizations; investigation techniques; organic chemistry and compounds; engineering and environmental geology; ecology, environmental biology, veterinary science, veterinary medicine; water pollution; human biology and biomedical sciences; environmental influences on the human organism; medicine; medical education; medical research and experimental medicine; medical technology; drugs and narcotics hygiene and control; environmental hygiene; social medicine and health service, industrial and occupational medicine; medical practice, therapeutics and special systems; poisoning, toxicology; parasitic diseases; zoonoses; environmental specialities of human biology and medicine; tropical medicine and biomedical studies; nervous system and sense organs, neurology; ophthalmology and optometry: eyes and sight; social psychology; curriculum and curriculum development; food and nutrition; social planning, development planning; social change and social processes; women; demography, population study; disaster relief and aid; sectorial economics; industrial health engineering; safety engineering; mining safety, mine risks and damage.
Servicing: WHO Member and Associate Member Governments, organizations with official relations with WHO and international or national institutions related to public health, as well as the WHO Secretariat.

INFORMATION SOURCES

WHO internal reports and unpublished documents.

INDEXING AND/OR CLASSIFICATION TOOLS

WHO programme classification and WHO thesaurus.

SERVICES PROVIDED

searches on request; question/answer; advisory service on system; referral point to other WHO programme activities.

PRODUCTS

Examples of WHO publications catered for periodic updating/dissemination of health or health related information are:

(a) NON-SERIAL: Vaccination Certificate Requirements for International Travel, Environmental Health Criteria, International Nonproprietary Names (INN) for Pharmaceutical Substances, International Standards for Drinking Water, Manual of the International Classification of Diseases, Injuries and Causes of Death, Oral Health Surveys: Basic Methods, Specifications for Pesticides used in Public Health, World Directory of Medical Schools, World Directory of Dental Schools, World Directory of Post-Basic and Post-Graduate Schools of Nursing, World Directory of Schools for Animal Health Assistants, World Directory of Schools for Medical Assistants, World Directory of Schools of Pharmacy, World Directory of Schools of Public Health, World Directory of Venereal Disease Treatment Centres at Ports, World Directory of Veterinary Schools, etc..

(b) SERIAL: Monograph Series (Essentially, text books for post-graduate worker), Public Health Papers (draw attention to modern trends and changing concepts in public health), WHO Offset Publications (make generally available material that for economic, technical or other reasons cannot be included in WHO's regular publications programme), Technical Report Series (contain the reports of WHO expert committees, subcommittees, joint committees with other specialized agencies, and other study and advisory groups, whose function is to give technical advice to the Organization), and International Histological Classification of Tumors (a series of books for international agreement on histological criteria for the classification of cancer types and a standardized nomenclature).

(c) PERIODICAL: Bulletin of the World Health Organization (six times a year, with supplements; surveys of present situation in particular fields related to different aspects of the Organization's programme). WHO Chronicle (monthly; intended to keep physicians and public health workers informed of activities in public health undertaken under the auspices, or with the participation, of WHO; contains accounts of programmes for the control of various diseases, and of work done in the laboratory, in the clinic, or in the field, as well as reviews of all the Organization's technical publications), International Digest of Health Legislation (quarterly; the only periodical devoted solely to the publication of health legislation of international significance; with supplementary issues of comparative studies of legislation on special subjects; cumulative indexes every five years; microfiche edition available in English), World Health Statistics Report (quarterly, monthly up to December 1976; contains analyses and comments on global and regional health problems and trends and on factors influencing them, supported by recent statistics on selected subjects in advance of final publication in the World Health Statistics Annual), World Health Statistics Annual (annually; vital statistics, statistics on infectious diseases covering cases and death, vaccination statistics, statistics on health personnel and hospital establishment). Weekly Epidemiological Record (weekly; contains notifications made under the International Health Regulations; epidemiological notes on communicable diseases of international importance).

INTERNATIONAL TELEGRAPH SERVICE

Operational since 1976: wholly manual.
RM Division, ITU.
Type of system: international register.

OBJECTIVES
to provide detailed information on the various kinds of international telegraph-type services available in various countries as well as on the decisions taken by administrations and recognized private operating agencies.

SCOPE AND SUBJECT COVERAGE
geographic coverage worldwide; period coverage current; carrier languages English, French, Spanish.
Provides information on: telegraphy and telex communication.
Servicing: member administrations and recognized private operating agencies.

INFORMATION SOURCES
laws and regulations, unpublished documents.

INDEXING AND/OR CLASSIFICATION TOOLS
own thesaurus.

SEARCH ELEMENTS
country.

SERVICES PROVIDED
services include regular publications: supplementary services include question/answer service for member administrations and recognized private agencies only.

PRODUCTS
General Information relating to the operation of the International Telegraph Service: in English, French, Spanish; issued 1 x 4 yrs, supplement 1 x 6 m. Publisher: ITU. Price on request.

WORLD WEATHER WATCH

Operational since January 1968; computer assisted.
World Weather Watch Department, WMO.
Type of system: information analysis, data bank, clearing house.

OBJECTIVES
to make available on a real-time basis to all countries in the world the meteorological and other environmental information needed for socio-economic development. To build up and make accessible compatible data banks of digitized meteorological and environmental data i.e. non-real-time applications. To improve knowledge of the weather and climate in support of various human activities and to disseminate the underlying know-how. To foster the utilization of advanced technologies for the acquisition, processing and transmission of meteorological and related environmental information. The World Weather Watch has three essential elements: the Global Observing System (GOS) consisting of facilities and arrangements for making observations at stations on land and at sea, from aircraft, meteorological satellites and other platforms; the Global Data-processing System (GDPS), consisting of meteorological centres with arrangements for the processing of the required observational data, real-time uses, and for the storage and retrieval of data, non-real-time uses; the Global Telecommunication System (GTS) consisting of telecommunication facilities and arrangements necessary for the rapid and reliable collection and distribution of the required observational data and processed information. The World Weather Watch operates through a system of World Meteorological Centres (WMCs), Regional Meteorological Centres (RMSs), Regional Telecommunication Hubs (RTHs) and National Meteorological Centres (NMCs), linked together by a data transmission network. The technical coordination of the WWW is carried out by the WMO Commission for Basic Systems and by the WWW Department of WMO.

SCOPE AND SUBJECT COVERAGE
geographic coverage worldwide; period coverage, current data for real-time applications and digitized data banks for contemporary and historical records; carrier language, basic meteorological data transmitted and stored in numerical code and processed information normally in pictorial form, transmitted in analogue or digital facsimile or in special grid codes.
Provides information on: basic meteorological, hydrological, oceanographic and other environmental data; warnings and forecasts for general purposes and for many types of special weather analyses, activities, e.g. agriculture, shipping, fishing, transportation, hydrology, water management, industry, recreation, etc.; warnings against natural disasters due to meteorological phenomena, particularly tropical cyclones.
Servicing: Member States, various international programmes.

INFORMATION SOURCES
meteorological and related environmental reports from land, sea and space stations; holdings of source material: WMCs, RMCs and, to a lesser extent, NMCs are in charge of the storage and retrieval of the basic observational data as well as the processed information and make these available on request.

INDEXING AND/OR CLASSIFICATION TOOLS
own thesaurus.

SERVICES PROVIDED
regular services include daily weather analyses, warnings and forecasts for general purposes and special applications; over 2000 charts processed daily on real-time basis at WWW centres and internationally disseminated in pictorial or digital form; also available, compatible data banks of meteorological and related environmental data.

LIBRARY OF THE WORLD METEOROLOGICAL ORGANIZATION

Operational since 1951; wholly manual.
Library Service, WMO.
Type of system: library.

OBJECTIVES
to provide basic reference service on matters within the field of activities and programmes of WMO.

SCOPE AND SUBJECT COVERAGE
geographic coverage worldwide; period coverage; since 1950, collection in several languages, principally in English.
Provides information on: atmospheric and environmental sciences, meteorology, climatology, oceanography, hydrology and their applications to various human activities. The library has also a collection of printed publications issued by the International Meteorological Organization (IMO: 1873-1951), predecessor of WMO.
Servicing: Member States, WMO Secretariat, meteorologists, technical co-operation experts, research workers and students.

INFORMATION SOURCES
monographs, serials, reports. Back-up literature: items included in the library.

INDEXING AND/OR CLASSIFICATION TOOLS
UDC classification.

SEARCH ELEMENTS
by country, personal author, corporate author, conference, UN or other international organizations.

SERVICES PROVIDED
The WIPO library collection may be consulted only in the library itself. However, some publications may be borrowed by outside readers on special request through inter-library loan services only.

PATENT INFORMATION NETWORK

PATENT DOCUMENTATION AND INFORMATION SYSTEM: Component I

Operational from 1945 and earlier; computer assisted.
Patent Information Division, WIPO.
Joint operation with Industrial Property Offices of Governments of Member States.
Type of system: information analysis, referral, library.

SYSTEM CONTACT POINTS - see Part III List B.

Argentina	Finland	Italy	Romania
Australia	France	Japan	South Africa
Austria	German Democratic Republic	Kenya	Spain
Belgium	Germany, Federal Republic of	Luxembourg	Sweden
Brazil	Greece	Malawi	Switzerland
Bulgaria	Hong-Kong	Monaco	USSR
Canada	Hungary	Mongolia	United Kingdom
Cuba	India	Netherlands	USA
Cyprus	Ireland	Norway	Yugoslavia
Czechoslovakia	Israel	Philippines	Zambia
Denmark		Poland	
Egypt		Portugal	

OBJECTIVES
To collect, process, provide and distribute patent documents; to improve access to and to classify the technological information contained in patent documents.

SCOPE AND SUBJECT COVERAGE
Geographical coverage worldwide; period coverage since 1920 and earlier; carrier languages are languages of document publishing countries.
Provides technical information in all fields of technology where industrially applicable inventions are made.
Servicing: industrial property offices, government agencies, industry, inventors, research centres, documentation centres, development aid agencies, UN organizations.

INFORMATION SOURCES
primarily patent documents, also selected monographs, serials, dissertations, proceedings, technical reports, trade catalogues. 200,000 to 500,000 items added last year.

INDEXING AND/OR CLASSIFICATION TOOLS
International Patent Classification (IPC, over 51,000 entries), national classification systems.

SEARCH ELEMENTS
by publication number, country.

SERVICES PROVIDED by Input Centres
yearly indexes, novelty searches, state-of-the art searches, infringement searches, international search reports under the Patent Cooperation Treaty (PCT), library services, public reading rooms, reprography, supplying documents on a regular basis in given technological field, question/answer service, training in use of the search systems.

PRODUCTS
Printed specifications of patent documents: approximately 900,000/yr.
Official gazettes: published monthly or weekly according to country contain, all relevant announcements on filing and procedure of patent and inventors' certificate applications.
CAPRI file lists: standardized inventories of patent documents classified according to the IPC.
IPC Text: internationally approved classification for classifying inventions described in patent documents; approx. 51,000 subdivisions plus catchword index; issued 1 o 5 yrs; in English, French, German, Spanish, Russian, Japanese, Portuguese, Czech, Finnish

Canada	Hungary	Mongolia	United Kingdom
Cuba	India	Netherlands	USA
Cyprus	Ireland	Norway	Yugoslavia
Czechoslovakia	Israel	Philippines	Zambia
Denmark		Poland	
Egypt		Portugal	

OBJECTIVES
to build a worldwide data bank of bibliographic data related to patent documents; to provide and improve access to information on the granting, the legal status and the working of patents.

SCOPE AND SUBJECT COVERAGE
geographic coverage: worldwide; coverage: since 1979, carries languages English, French, German, Spanish.

INFORMATION SOURCES
patent documents, official gazettes, magnetic tapes, punched cards, punched paper tapes. Basic bibliographic data of 6,000,000 patent documents available in data bank by end 1977, 900,000 added in each year.

INDEXING AND/OR CLASSIFICATION TOOLS
International Patent Classification (IPC), US Patent Office Classification.

SEARCH ELEMENTS
By document number, country, International Patent Classification symbol, priority, application number, corporate entry, title, personal author, US Patent Office Classification Symbol.

SERVICES PROVIDED
regular retrospective on-line bibliographic updates, profiles, standard profiles, magnetic tape versions, current awareness, SDI, question/answer service, copyography, training in use of data base, advisory services on data base.

PRODUCTS
Extended Data Tape (EDT): standardized bibliographic data of newly published patent documents, approx. 58,000 docs/wk; issued 1 x wk.
INPADOC Family data tape (IFD): standardized bibliographic data of newly published patent documents plus information on 'patent families', approx. 58,000 docs/wk; issued 1 x wk.
Patent Family Service (PFS): CDR indexes of patent documents by priority country and priority number order; issued 8 x pa, cumulated 1 x 5 yrs.
Patent Classification Service (PCS): CDR index of patent documents organized according to IPC symbols order; issued 4 x pa, cumulated 1 x 5 yrs.
Patent Information Service (PIS): CDR index of patent documents by inventor's name, issued 4 x pa, cumulated 1 x 5 yrs.
Numerical Data Base (NDB): CDR indexes of patent documents according to publication number order; issued 8 x pa, cumulated 1 x 5 yrs.
INPADOC Patent Gazette (IPG): International Patent Gazette on CDR covering 24,000 documents per week contain persons by number (SNI), by IPC symbols (SCS), by applicant's name (SAS); issued 1 x wk.
All products published and sold by INPADOC, Vienna. Prices on request.

COMPUTER INDEX OF MICROSCOPIC NEUTRON DATA

Year commenced current (1967); computer associated.
Nuclear Data Section, IAEA.
Type of system: bibliographic.

INPUT CENTRES - see Part III List B.
national, regional and international centres contributing to input.
Austria France USSR USA

OBJECTIVES
to act as index of literature and magnetic tape libraries on neutron nuclear reaction data including cross-sections and all other reaction parameters; marginally including spontaneous fission data, photo-neutron data, photofission data.

SCOPE AND SUBJECT COVERAGE
geographic coverage worldwide; period coverage since 1932; carrier language English.
Provides information on: nuclear physics.
Servicing: scientists involved in nuclear physics or in applying nuclear technology

INFORMATION SOURCES
monographs, articles, reports, dissertations, proceedings, unpublished documents, progress reports of nuclear physics institutes, numerical data libraries held on magnetic tape. 140,000 items available to system; 17,000 added in last year. Back-up literature: 700 items maintained in the libraries of the 6 input contributing centres.

INDEXING AND CLASSIFICATION TOOLS
own thesaurus.

SEARCH ELEMENTS
geographic region, country, personal author, institution, conference, report, standard, nuclide reaction, energy range.

SERVICES PROVIDED
regular services include nuclear publications; supplementary services include searches on request, SDI.

PUBLICATIONS
CINDA, 1976 (2 volumes) - cumulation of 8 vols - June 1976; 9 supplements - Dec 1976, June 1977, Dec 1977, also available on magnetic tape in English, ISBN 92-0-035076-6. Publisher: IAEA. Price on request.

Nuclear Data Section, IAEA.
Type of system: data bank.

INPUT SOURCES - see Part III Sect 6.
national, regional and international centres contributing to input.
Austria, Germany, Federal, USSR, USA
France, Republic of

OBJECTIVES
To act as magnetic tape library for experimental numerical data on cross-sections and all other reaction parameters of nuclear reaction data.

SCOPE AND SUBJECT COVERAGE
geographic coverage worldwide; period coverage since 1950; common language English.
Provides information on: nuclear reaction experiments.
Services: assistance available on nuclide physics and on applying nuclear technologies.

INFORMATION SOURCES
monographs, serials, reports, communications, & proceedings, unpublished documents. 2.5 million records available in system; 10,000 or more added in last year.

INDEXING AND/OR CLASSIFICATION TOOLS
see thesaurus.

SEARCH ELEMENTS
geographic region, country, title, personal author, institution, conference, report, standard, nuclide, reaction, data type, energy, etc.

SERVICES PROVIDED
regular services include: cost free magnetic tape retrievals on request; answer- EXFOR Neutron Nuclear Data and Spontaneous Fission Yield Data, see chapter on CINDA: A4FOR Data for Nuclear Reactions induced by Charged Particles, as chapter in Bibliography of Integral Charged Particle Nuclear Data by I.M. Barrows, U.S. Dept ERA-NCS-76001, March 1977. Supplementary services include SDI.

Central Republic of Cameroon	Indonesia	Philippines	USA
Czechoslovakia	Iran	Poland	Yugoslavia
Denmark	Iraq	Portugal	
Egypt	Ireland	Republic of Korea	
		Romania	

OBJECTIVES
To collect and make available an exhaustive coverage of full texts of all non-conventional documents, abstracts, reports, standards, patents, theses, etc.) on the peaceful applications of nuclear energy in collaboration with Member States. To collect and make available an exhaustive coverage of full texts of documents, abstracts. To assist Member States in improving their methods of nuclear information handling.

SCOPE AND SUBJECT COVERAGE
Bibliographic records, abstracts, primary coverage since 1970; coverage language English, original language within 24 months.
Principle information are: peaceful uses of atomic energy, including: general physics; high energy physics; nuclear and nuclear physics; chemistry; materials; earth sciences; all effects and various aspects of science; radiation in biology; radiological effects and dosimetry; human studies in life sciences; applied life sciences; health, safety and environment; isotopes and radiation sources, isotopes and radiation applications; engineering; nuclear materials; instrumentation; waste management; economics; nuclear law; nuclear documentation; information and dissemination; methodology; methods and computer codes.
Sources: through National (NIS) Centres, organizations and scientists in Member States performing research on the peaceful uses of nuclear energy.

INFORMATION SOURCES
Monographs, journals, reports, patents, standards, dissertations, proceedings, publications, laws and regulations, unpublished documents. 150,000 items available to system; 65,000 added in last year. Back-up literature: all non-conventional literature announced in INIS. Items more available on exhaustive from INIS Clearing House.

MACHINE READABLE CLASSIFICATION TOOLS
See thesaurus.

SEARCH ELEMENTS
Corporate entry, personal author, conference, report, standard, patent number.

SERVICES PROVIDED
Digital services include the dissemination of output products. GIS Standards, GIS Geographic Imagery Service, GIS Environmental Systems Research Institute (ESRI) Application Service Providers (ASP) and GIS Hosting Services. Geographic Information Systems (GIS) Technology. Geographic Information Systems (GIS) Software Application Development Services. Geographic Information Systems (GIS) Consulting Services. Geographic Information Systems (GIS) Software Design Services. Geographic Information Systems (GIS) Software Maintenance Services.
Note: See 123 reference GIS Service provide all of these applicable services.

WORLD REQUEST LIST FOR MEASUREMENTS OR EVALUATIONS OF NUCLEAR DATA

Operational since 1960; computer assisted.
Nuclear Data Section, IAEA.
Type of system: information analysis, international register, referral.

INPUT CENTRES - see Part III List B.
national, regional and international centres contributing to input.
Austria France USSR USA

OBJECTIVES
to provide researchers in nuclear physics and their funding organizations with the means with which to evaluate high priority nuclear data, primarily for application in fission reactor development, fusion reactor development and nuclear safeguard methods.

SCOPE AND SUBJECT COVERAGE
geographic coverage worldwide; period coverage since 1968; carrier language: English.
Provides information on: nuclear physics; nuclear reactions.
Servicing: nuclear data research organizations and scientists.

INFORMATION HANDLED
data entries. 1,672 items available in system, approx. 600 added in last year.

INDEXING AND/OR CLASSIFICATION TOOLS
own thesaurus.

SEARCH ELEMENTS
geographic region, country, personal author, institution.

SERVICES PROVIDED
services include regular publications; supplementary services include searches on request.

PRODUCTS
NUCLEA reporter; also available on magnetic tape; in English; issued 1 a 2 yrs; ISSN 36-7539.
Publisher: IAEA. Cost free.

TARIFF AND TRADE DATA FILES

Operational since 1969; computer assisted.
Trade Intelligence Division, GATT.
Type of system: data bank.

OBJECTIVES
to provide basic documentation on customs tariffs and the corresponding imports of major trading countries participating in trade negotiations.

SCOPE AND SUBJECT COVERAGE
geographical coverage of Australia, Austria, Canada, European Economic Community, Finland, Japan, New Zealand, Norway, Sweden, Switzerland, USA; period coverage since 1970; carrier languages English, French.
Provides information on: international foreign trade imports.
Servicing: above Member States.

INFORMATION SOURCES
reports, laws and regulations, customs, tariffs and import statistics. 2,500,000 entries available to system; 550,000 added in last year.

SEARCH ELEMENTS
by country and CCCN Code.

SERVICES PROVIDED
regular services include standard profiles, magnetic tape copy of whole data file, retrieval of individual data in print or on tape, summaries in printed form; supplementary services include data retrieval (8 searches on request), advisory service on system.

PRODUCTS
Computerized tariff and trade data files: magnetic tape per reporting country containing the tariff and trade data file and the tariff line description file; in English and French; issued irregularly. Complete data files restricted to participating governments, individual data or set of data free for other use. Publisher: GATT. Price on request.

PART IV Subject Index

The subject index is intended to help users to find information systems which deal with a given subject field.

The index is based on the principal headings of the Broad System of Ordering (BSO) prepared by the Federation Internationale de Documentation in cooperation with the UNISIST/UNESCO. In order to help those not familiar with the BSO, the principal headings have been arranged alphabetically supplemented, as necessary , by secondary subject headings. "See" and "See also" references have been added when this seemed helpful.

How to use the index

Under each heading references to the relevant information systems are given. The reference consists of the organisation's acronym and reference number followed by the information system reference number and acronym.

For example:

COMMUNICATION SCIENCE AND TECHNIQUES - See also INFORMATION SCIENCE AND DOCUMENTATION
UNESCO 53-01 CDS
UNESCO 53-02 LIB
UPU 58-01 POSTLIST
ITU 59-01 AR
.....etc

NUCLEAR PHYSICS AND CHEMISTRY
IAEA 63-01 CINDA
IAEA 63-02 EXFOR
IAEA 63-03 INIS
.....etc

Multiple entries

Some information systems are given only once in the index when their content seems to be sufficiently well described by the headings used. Others appear under several headings reflecting different aspects of the subject matter which they deal with.

Further information

The subject index refers the user back to the system description in Part II and the organisations in Part I. Further information on the scope and content of the systems and the services offered can be obtained from the national contact points or the offices of the organisations given in Part III.
